Completing the square

(9 - 1) Topic booklet

HIGHER

These questions have been collated from previous years GCSE Mathematics papers.

You must have: Ruler graduated in centimetres and millimetres, protractor, pair of compasses, pen, HB pencil, eraser.

Total Marks

Instructions

- •Use black ink or ball-point pen.
- •Fill in the boxes at the top of this page with your name, centre number and candidate number.
- •Answer all questions.
- •Answer the questions in the spaces provided
- there may be more space than you need.
- •Diagrams are NOT accurately drawn, unless otherwise indicated.
- You must show all your working out.
- •If the question is a **1F** question you are not allowed to use a calculator.
- •If the question is a **2F** or a **3F** question, you may use a calculator to help you answer.

Information

- •The marks for **each** question are shown in brackets
- use this as a guide as to how much time to spend on each question.

Advice

- •Read each question carefully before you start to answer it.
- •Keep an eye on the time.
- •Try to answer every question.
- •Check your answers if you have time at the end.

Answer ALL questions Write your answers in the space provided. You must write down all the stages in your working.

11 Write $x^2 + 2x - 8$ in the form $(x + m)^2 + n$ where m and n are integers.	
Specimen 1 – Paper 3H	(Total for Question 11 is 2 marks)
13 Write $x^2 + 6x - 7$ in the form $(x + a)^2 + b$	where a and b are integers.
November 2017 – Paper 3H	(Total for Question 13 is 2 marks)
17 Write down the coordinates of the turning point of	on the graph of $y = (x + 12)^2 - 7$
N. 1 2020 D 211	(, ,
November 2020 – Paper 2H	(Total for Question 17 is 1 mark)

17 Here is a sketch of a curve.

The equation of the curve is $y = x^2 + ax + b$ where a and b are integers.

The points (0, -5) and (5, 0) lie on the curve.

Find the coordinates of the turning point of the curve.

19	Given that $x^2 - 6x + 1 = (x - a)^2 - b$ for a	all values of x ,			
	(i) find the value of a and the value of b.				
	(i) This the value of u and the value of v.				
			<i>a</i> =		
			<i>b</i> =		
				(2)	
	(ii) Hence write down the coordinates of the tu	rning point on th	the graph of $y = x^2$	-6x + 1	
			((1))
Im	ne 2019 – Paper 1H	(Total	for Question 19 is		
Jui	ic 2019 – 1 apet 111	(10tai	101 Question 19 is	3 marks)	

1 The equation of a curve is $y = 4x^2 - 56x$ The curve has one turning point.				
By completing the square, show that the coordinates of the turning point are $(7, -196)$ You must show all your working.				
November 2022 – Paper 3H (Total for Question 21 is 3 marks)				
November 2022 – Paper 3H (Total for Question 21 is 3 marks)				
November 2022 – Paper 3H (Total for Question 21 is 3 marks)				
November 2022 – Paper 3H (Total for Question 21 is 3 marks)				
November 2022 – Paper 3H (Total for Question 21 is 3 marks)				
November 2022 – Paper 3H (Total for Question 21 is 3 marks)				
November 2022 – Paper 3H (Total for Question 21 is 3 marks)				
November 2022 – Paper 3H (Total for Question 21 is 3 marks)				

Find the coordinates of the turning point You must show all your working.	on the curve with equation $y = 9 + 18x - 3x^2$	
	(, ,	
ovember 2021 – Paper 1H	(Total for Question 22 is 4 marks))

23 (a) Write $2x^2 + 16x + 35$ in the form $a(x+b)^2 + c$ wh	here a , b , and c are integers.
	(3)
(b) Hence, or otherwise, write down the coordinates of of $y = 2x^2 + 16x + 35$	the turning point of the graph
	(1)
Specimen 2 – Paper 3H	(Total for Question 23 is 4 marks)
