

1. ... of data.

Work ... cards have to be if there is:

- Mean = 6
- Range = 2
- Mode = 6
- Mean = 6

Available from  
**my TES**

(3 marks)

2. Here is some data

7.5	8.2	7.2
7.2	6.5	6.4
5.4	6	7.4

account

(a) Use this data to draw a ... gram below.

(b) Calculate the range

.....

(c) Calculate the mode

.....

(c) Calculate the median

.....

(5 marks)

3. A frequency polygon has been drawn for the table.

Height (cm)	Frequency
$0 < h \leq 10$	3
$10 < h \leq 20$	14
$20 < h \leq 30$	7
$30 < h \leq 40$	6

(a) What mistake is made.

.....

(2 marks)

4.

Convert

- (i) 16 kg .....
- (ii) 20 lbs .....
- (iii) 60 kg .....
- (iv) 350 lbs .....

Available from **my TES** account (4 marks)

5. The table show the ..... of school students.

Height (cm)	Freq
$130 < h \leq 140$	3
$140 < h \leq 150$	18
$150 < h \leq 160$	4
$160 < h \leq 170$	1

- (a) State the modal class interval. ....
- (b) Find the group that contains the median. ....
- (c) Estimate the mean. ....

(5 marks)

6. Gabriel is going to the match, which is 30 miles away,  
His average speed is 40 mph.  
How long should it take him to get there?
