Probability

(9-1) Topic booklet

HIGHER

These questions have been collated from previous years GCSE Mathematics papers.

You must have: Ruler graduated in centimetres and millimetres, protractor, pair of compasses, pen, HB pencil, eraser.

Total Marks

Instructions

- •Use black ink or ball-point pen.
- •Fill in the boxes at the top of this page with your name, centre number and candidate number.
- •Answer all questions.
- Answer the questions in the spaces provided
- there may be more space than you need.
- •Diagrams are NOT accurately drawn, unless otherwise indicated.
- ·You must show all your working out.
- •If the question is a **1F** question you are not allowed to use a calculator.
- •If the question is a **2F** or a **3F** question, you may use a calculator to help you answer.

Information

- •The marks for **each** question are shown in brackets
- use this as a guide as to how much time to spend on each question.

Advice

- •Read each question carefully before you start to answer it.
- •Keep an eye on the time.
- •Try to answer every question.
- •Check your answers if you have time at the end.

Answer ALL questions Write your answers in the space provided. You must write down all the stages in your working.

1 There are only blue cubes, red cubes and yellow cubes in a box.

The table shows the probability of taking at random a blue cube from the box.

Colour	blue	red	yellow	
Probability	0.2			

The	number	of red	cubes in	the h	oox is	the	same	as	the	number	of	vellow	cubes	in	the	box.
1110	Humber	OI ICG	Cubes III	uic t	JUA 15	uic	Sume	0.00	uiv	Humber	O.	y CHO W	Cubes		unc	OUA.

(a) Complete the table.

(2)

There are 12 blue cubes in the box.

(b) Work out the total number of cubes in the box.

(2)

June 2019 – Paper 1H

(Total for Question 1 is 4 marks)

1 The table shows the probabilities that a biased dice will land on 2, on 3, on 4, on 5 and on 6

Number on dice	1	2	3	4	5	6
Probability		0.17	0.18	0.09	0.15	0.1

Neymar rolls the biased dice 200 times.

Work out an estimate for the total number of times the dice will land on 1 or on 3

3	B David has designed a game. He uses a fair 6-sided dice and a The dice is numbered 1 to 6 The spinner is numbered 1 to 5	a fair 5-sided spinner.			
	Each player rolls the dice once a A player can win £5 or win £2	and spins the spinner on	ce.		
	rol a	n £5 l a 5 nd n a 5	win £2 roll a 1 or spin a 1 or both		
	David expects 30 people will pla Each person will pay David £1 t				
	(a) Work out how much profit I			£(4)	
	(b) Give a reason why David's a make.	actual profit may be diff	erent to the profit h	ne expects to	
				(1)	
Sp	Specimen 2 – Paper 1H		(Total for Quest	tion 3 is 5 marks)	

3 There are only red counters, blue counters, green counters and yellow counters in a bag.

The table shows the probabilities of picking at random a red counter and picking at random a yellow counter.

Colour	red	blue	green	yellow
Probability	0.24			0.32

The probability of picking a blue counter is the same as the probability of picking a green counter.

Complete the table.

Specimen 1 – Paper 1H

(Total for Question 3 is 2 marks)

4	There are only blue cubes, yellow cubes and green cubes in a bag.
	There are
	twice as many blue cubes as yellow cubes and four times as many green cubes as blue cubes.
	Hannah takes at random a cube from the bag.
	Work out the probability that Hannah takes a yellow cube.
NT.	(Total for Overtion 4 is 3 montes)
No	ovember 2017 – Paper 2H (Total for Question 4 is 3 marks)

Ne	ovember 2017 – Paper 2H (Total for Question 4 is 3 marks)
Ne	ovember 2017 – Paper 2H (Total for Question 4 is 3 marks)

6 There are some counters in a bag.

The counters are red or white or blue or yellow.

Bob is going to take at random a counter from the bag.

The table shows each of the probabilities that the counter will be blue or will be yellow.

Colour	red	white	blue	yellow
Probability			0.45	0.25

There are 18 blue counters in the bag.

The probability that the counter Bob takes will be red is twice the probability that the counter will be white.

(a) Work out the number of red counters in the bag.

	(4)	

A marble is going to be taken at random from a box of marbles.

The probability that the marble will be silver is 0.5

There must be an even number of marbles in the box.

(b) Explain why.

(1)

June 2018 – Paper 3H

(Total for Question 6 is 5 marks)

6 Four friends each throw a biased coin a number of times.
The table shows the number of heads and the number of tails each friend got.

	Ben	Helen	Paul	Sharif
heads	34	66	80	120
tails	8	12	40	40

The coin is to be thrown one more time.

Specimen 1 – Paper 1H

a) Which of the four friends' results will give the best estimat the coin will land heads? Justify your answer.	e for the probability that
	(1)
aul says, "With this coin you are twice as likely to get hea	ds as to get tails."
b) Is Paul correct? Justify your answer.	
	(2)
The coin is to be thrown twice.	(2)
 Use all the results in the table to work out an estimate for the will land heads both times. 	he probability that the coin

(2)

(Total for Question 6 is 5 marks)

8 There are some counters in a bag.
The counters are blue or green or red or yellow.

The table shows the probabilities that a counter taken at random from the bag will be blue or will be green.

Colour	blue	green	red	yellow
Probability	0.32	0.20		

The probability that a counter taken at random from the bag will be red is five times the probability that the counter will be yellow.

There are 300 counters in the bag.

Work out the number of yellow counters in the bag.

November 2020 – Paper 3H

(Total for Question 8 is 3 marks)

8 When a drawing pin is dropped it can land point down or point up.

Lucy, Mel and Tom each dropped the drawing pin a number of times.

The table shows the number of times the drawing pin landed point down and the number of times the drawing pin landed point up for each person.

	Lucy	Mel	Tom
point down	31	53	16
point up	14	27	9

Rachael is going to drop the drawing pin once.

(a)	Whose results will	give the b	est estimate	for the	probability	that the	drawing	pin '	will
	land point up?								

Give a reason for your answer.

(1)

Stuart is going to drop the drawing pin twice.

(b) Use all the results in the table to work out an estimate for the probability that the drawing pin will land point up the first time and point down the second time.

(2)

10 Lina spins a biased 5-sided spinner 40 times.

Here are her results.

Score	1	2	3	4	5
Frequency	6	8	9	7	10

Lina is now going to spin the spinner another two times.

(a) Work out an estimate for the probability that she gets a score of 5 both times.

(2)

Derek is going to spin the spinner a large number of times.

(b) Work out an estimate for the percentage of times Derek can expect to get a score of 1

.....%

November 2022 – Paper 1H

(Total for Question 10 is 4 marks)

10	There are only blue counters, yellow counters, green counters and red counters i	in a	a bag.
	A counter is taken at random from the bag.		

The table shows the probabilities of getting a blue counter or a yellow counter or a green counter.

Colour	blue	yellow	green	red
Probability	0.2	0.35	0.4	

((a)	Work	out	the	probability	of	getting	a	red	counter
١		TOTAL	Out	uic	probability	O.	Setting	u	100	counter

(1)

(b) What is the least possible number of counters in the bag? You must give a reason for your answer.

(2)

November 2017 – Paper 3H

(Total for Question 10 is 3 marks)

14 Sally plays two games against Martin. In each game, Sally could win, draw or lose.	
In each game they play, the probability that Sally will win against Martin is 0.3 the probability that Sally will draw against Martin is 0.1	
Work out the probability that Sally will win exactly one of the two games against Martin.	
November 2020 – Paper 1H (Total for Question 14 is 3 marks)	

16	A first aid test has two parts, a theory test and a practical to The probability of passing the theory test is 0.75. The probability of passing only one of the two parts is 0.3.	
	The two events are independent.	
	Work out the probability of passing the practical test.	
Im	nne 2022 – Paper 1H	Total for Question 16 is 4 marks)
3 (11	ino 2022 Tupot III	Total for Question to 15 4 marks)

16	There are only 3 red counters and 5 yellow counters in a bag.
	Jude takes at random 3 counters from the bag.
	Work out the probability that he takes exactly one red counter.
No	ovember 2021 – Paper 1H (Total for Question 16 is 4 marks)
	, , , , , , , , , , , , , , , , , , , ,

16	Marek	has 9	cards.
	Titter off	1100	our cio.

There is a number on each card.

1 2 3 4 5 6 7 8 9

Marek takes at random two of the cards.

He works out the product of the numbers on the two cards.

Work out the probability that the product is an even number.

November 2019 – Paper 2H

(Total for Question 16 is 3 marks)

16	There are only red counters and blue counters in a bag.
	Joe takes at random a counter from the bag. The probability that the counter is red is 0.65 Joe puts the counter back into the bag.
	Mary takes at random a counter from the bag. She puts the counter back into the bag.
	(a) What is the probability that Joe and Mary take counters of different colours?
	(2)
	There are 78 red counters in the bag.
	(b) How many blue counters are there in the bag?
	(2)
No	vember 2018 – Paper 2H (Total for Question 16 is 4 marks)

16	There are only red counters, blue counters and purple counters in a bag. The ratio of the number of red counters to the number of blue counters is 3:17		
	Sam takes at random a counter from the bag. The probability that the counter is purple is 0.2		
	Work out the probability that Sam takes a red counter.		
Ju	ne 2018 – Paper 1H (Total for Question 16 is 3 marks)		

16 The probability that Sanay is late for school tomorrow is 0.05				
The probability that Jaden is late for so				
Alfie says that the probability that Sanay and Jaden will both be late for school is 0.0075 because $0.05\times0.15=0.0075$				
What assumption has Alfie made?				
Specimen 2 – Paper 1H (Total for Question 16 is 1 mark)				

18 Thelma spins a biased coin twice. The probability that it will come down heads both times is 0.09		
Calculate the probability that it will come down tails b	ooth times.	
Specimen 1 – Paper 3H	(Total for Question 18 is 3 marks)	

19	There are only blue counters, red counters and green counters in a box.
	The probability that a counter taken at random from the box will be blue is 0.4. The ratio of the number of red counters to the number of green counters is 7:8
	Sameena takes at random a counter from the box. She records its colour and puts the counter back in the box. Sameena does this a total of 50 times.
	Work out an estimate for the number of times she takes a green counter.

if it rains on one day, the probability that it will rain on the next day is 0.8 if it does **not** rain on one day, the probability that it will rain on the next day is 0.6

A weather forecaster says,

"There is a 70% chance that it will rain in the village on Monday."

Work out an estimate for the probability that it will rain in the village on Wednesday. You must show all your working.

(Total for Question 20 is 4 marks)

20 Pat throws a fair coin <i>n</i> times.	
Find an expression, in terms of n , for the probability the least 1 tail.	hat Pat gets at least 1 head and at
November 2021 – Paper 3H	(Total for Question 20 is 2 marks)

20 There are only red sweets and yellow sweets in a bag.

There are n red sweets in the bag.

There are 8 yellow sweets in the bag.

Sajid is going to take at random a sweet from the bag and eat it.

He says that the probability that the sweet will be red is $\frac{7}{10}$

(a) Show why the probability cannot be $\frac{7}{10}$

(3)

After Sajid has taken the first sweet from the bag and eaten it, he is going to take at random a second sweet from the bag.

Given that the probability that both the sweets he takes will be red is $\frac{3}{5}$

(b) work out the number of red sweets in the bag. You must show all your working.

(5)

21	Rav	has	nine	cards	numbered	1	to	g
41	ixay	mas	IIIIIC	carus	Humbered	1	w	J

1 2 3 4 5 6 7 8 9

Ray takes at random three of these cards.

He works out the sum of the numbers on the three cards and records the result.

Work out the probability that the result is an even number.

June 2022 – Paper 3H

(Total for Question 21 is 4 marks)

21 When a biased coin is thrown 4 times, the probability of getting 4 heads is Work out the probability of getting 4 tails when the coin is thrown 4 times.
