Simultaneous equations

(9 – 1) Topic booklet

These questions have been collated from previous years GCSE Mathematics papers.

You must have: Ruler graduated in centimetres and millimetres, protractor, pair of compasses, pen, HB pencil, eraser.

Total Marks

Instructions

- Use **black** ink or ball-point pen.
- Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions.
- Answer the questions in the spaces provided
– *there may be more space than you need.*
- Diagrams are NOT accurately drawn, unless otherwise indicated.
- You must **show all your working out.**
- If the question is a **1F** question you are not allowed to use a calculator.
- If the question is a **2F** or a **3F** question, you may use a calculator to help you answer.

Information

- The marks for **each** question are shown in brackets
– *use this as a guide as to how much time to spend on each question.*

Advice

- Read each question carefully before you start to answer it.
- Keep an eye on the time.
- Try to answer every question.
- Check your answers if you have time at the end.

Answer ALL questions
Write your answers in the space provided.
You must write down all the stages in your working.

16 Solve the simultaneous equations

$$\begin{aligned}3x + y &= -4 \\3x - 4y &= 6\end{aligned}$$

$x =$

$y =$

23 A pattern is made using identical rectangular tiles.

Find the total area of the pattern.

..... cm²

25 Solve the simultaneous equations

$$5x + y = 21$$

$$x - 3y = 9$$

$x = \dots\dots\dots$

$y = \dots\dots\dots$

27 Solve the simultaneous equations

$$x + 3y = 12$$

$$5x - y = 4$$

$$x = \dots\dots\dots$$

$$y = \dots\dots\dots$$

November 2017 – Paper 3F

(Total for Question 27 is 3 marks)

28 Solve the simultaneous equations

$$5x + 2y = 27$$

$$6x + 4y = 28$$

$$x = \dots\dots\dots$$

$$y = \dots\dots\dots$$

(a) Use these graphs to solve the simultaneous equations

$$\begin{aligned} 5x - 9y &= -46 \\ y &= -2x \end{aligned}$$

$$x = \dots\dots\dots$$

$$y = \dots\dots\dots$$

(1)

29 Solve the simultaneous equations

$$4x + y = 25$$

$$x - 3y = 16$$

$x = \dots\dots\dots$, $y = \dots\dots\dots$

Specimen 1 – Paper 1F

(Total for Question 29 is 3 marks)

30 Solve the simultaneous equations

$$3x - 4y = 11$$

$$9x + 2y = 5$$

$$x = \dots\dots\dots$$

$$y = \dots\dots\dots$$

June 2019 – Paper 3F

(Total for Question 30 is 3 marks)
